

408 Series

Single Stage Anodized Aluminium Bodied Scientific Regulator

The 408 Series regulators are intended for primary pressure control of mildly corrosive high purity gases such as ammonia, hydrogen sulphide and sulphur dioxide or for applications requiring the light weight of an aluminium body regulator.

- Pressure ranges of 0-15 to 0-500 PSI are available to cater for a broad range of applications
- Anodized aluminium body is cost effective corrosion resistance
- Versatility to configure the regulator with either front or rear panel mounting
- Metal-to-metal diaphragm seal prevents gas contamination
- Capsule seat design for greater serviceability and life
- 316L stainless steel diaphragm
- Special versions for ammonia and sulphur dioxide
